

INS LifeGuard

## Voice Extender

Our Voice Extender is designed to work with our L-401RV Dialler. It can be mounted anywhere in the home for two-way communication with our Emergency Response Centre in the event of an alarm.

When an alarm is triggered via the Voice Extender, our nurse can communicate right through the Voice Extender like a speaker phone, making it ideal for large or multiple-story homes where you may be further away from the Dialler.

### Features & Benefits

- Two-way hands-free voice communication allows a nurse in our Emergency Response Centre to talk to the user and listen-in to what is happening on their side through the built-in microphone and speaker without moving to be near the Dialler
- The convenience of hands-free phone calls
- One-button hands-free answering and disconnecting of phone calls

- Can be used to expand voice coverage area to reach every corner of your home
- 4-level Microphone sensitivity settings
- Can be installed anywhere to instantly summon assistance even when you're not near the Dialler
- Microphone and speaker can be remotely controlled by our nurses via DTMF commands
- Compatible with our L-401RV Diallers

### Specifications
