

INS LifeGuard

Range Extender

Increases maximum possible distance between console and transmitters / detectors

Our Range Extender is designed to increase the effectiveness of your alarm system by increasing the maximum possible distance between the alarm system's main console unit and any transmitters or smoke detectors used. It is suggested for those with larger or two-story homes to increase the range of transmitters and smoke detectors.

Features

- Compact and low-profile design
- LED x 2: for Power, Transmission and Fault Indicator
- Number of Sensors: 80

Specifications

- Power: 6V DC 100mA Adaptor
- Back-up Battery: 4.8V 600mA Ni-mH Battery (1.2V x 4)
- Battery Life: 24 hours
- Radio frequency: 433.92 MHz
- Range: Over 200 meters in open space
- Operating Temperature: -10° to 45°C
- Humidity: up to 90% non-condensing
- Dimensions: 155 x 60 x 35mm

Specifications subject to change at discretion of INS LifeGuard.
