

Security Key Holders

Prevent the need for forced entry into your home in the event of an emergency.

Portable model can be attached to the desired location and easily relocated as needed. Dimensions: 170mmH x 65W x 45D.

Fixed model can be wall-mounted and features a weather cover for protection from the elements. Dimensions: 117mmH x 79W x 52D

Secure key storage for easy access

Ambulance crews, assisted by the Police and Fire Brigade, often have to force entry into locked homes when someone who is ill or has had a fall cannot unlock the doors. In an emergency, when every second counts, a locked door could delay life-saving medical treatment.

For this reason, INS LifeGuard strongly recommends the use of its Security Key Holders.

The fixed model is usually mounted near the household electricity box, or near the front or rear doors. The portable model can be attached to a railing, pipe or other fixture, and can be easily removed and relocated.

Who needs a Security Key Holder?

Security Key Holders are especially suited to homes where the occupant:

- lives alone
- may collapse suddenly from a known medical condition
- has restricted mobility
- receives home visits from community services
- is prone to locking themselves out of the house

In the event of an emergency, we will alert emergency personnel, advising them of the Security Key Holder's location and its code.

Specifications subject to change at discretion of INS LifeGuard.
